Surveying Local Underlying Risk Drivers - A Methodology to Assess Vulnerability

Submitted by: Chile
Surveying Local
Underlying Risk Drivers

A methodology to assess vulnerability

CRISTÓBAL MENA
Deputy National Director
National Emergency Office of the Ministry of the Interior and Public Security (ONEMI)
The evolution of models reflect a dominant way of thinking to understand the cause of the problem

Adapted from Twigg (2016)
“Precautionary planning must commence with the removal of concepts of naturalness from natural disasters”

O´Keefe, Westgate and Wisner (1976)
“A range of underlying risk drivers, such as poor urban governance, vulnerable rural livelihoods and declining ecosystems, contribute to the translation of poverty and every day risk into disaster risk”

Global Assessment of Risk (2009)
